OPPORTUNITIES

Opportunity	Estimated Savings
▲ Properly size images	10.47s ⌄
▲ Serve images in next-gen formats	10.02s ⌄
▲ Efficiently encode images	3.00s ⌄
▲ Eliminate render-blocking resources	1.82s ⌄
■ Reduce unused JavaScript	0.75s ⌄

These suggestions can help your page load faster. They don't directly affect the performance score.

DIAGNOSTICS

▲ Serve static assets with an efficient cache policy — 24 resources found   ⌄

▲ Image elements do not have explicit `width` and `height`   ⌄

▲ Does not have a `<meta name="viewport">` tag with `width` or `initial-scale`

No `<meta name="viewport">` tag found   ⌄

▲ First Contentful Paint (3G) — 5625 ms   ⌄

○ Avoid chaining critical requests — 0 chains found

○ Keep request counts low and transfer sizes small — 27 requests • 3,030 KiB   ⌄

○ Largest contentful paint element — 1 element found   ⌄

○ Avoid large layout shifts — 5 elements found   ⌄

○ Avoid long main-thread tasks — 2 long tasks found   ⌄

Accessibility

These checks highlight opportunities to **improve the accessibility of your web app**. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

NAMES AND LABELS

▲ Image elements do not have `[alt]` attributes   ⌄

▲ Document doesn't have a `<title>` element   ⌄

▲ Links do not have a discernible name   ⌄

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, such as a screen reader.

CONTRAST

▲ Background and foreground colours do not have a sufficient contrast ratio.   ⌄

These are opportunities to improve the legibility of your content.

These are opportunities to improve the interpretation of your content by users in different locales.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)   Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on **conducting an accessibility review.**

SEO

These checks ensure that your page is following basic search engine optimisation advice. There are many additional factors that Lighthouse does not score here that may affect your search ranking, including performance on Core Web Vitals. Learn more.

MOBILE FRIENDLY

⚠ Does not have a `<meta name="viewport">` tag with `width` or `initial-scale`

No `<meta name="viewport">` tag found

⚠ Document doesn't use legible font sizes

Text is illegible because there's no viewport meta tag optimised for mobile screens.

⚠ Tap targets are not sized appropriately

Tap targets are too small because there's no viewport meta tag optimised for mobile screens

Make sure that your pages are mobile friendly so users don't have to pinch or zoom in order to read the content pages. Learn more.

CONTENT BEST PRACTICES

⚠ Document doesn't have a `<title>` element

⚠ Document does not have a meta description

⚠ Image elements do not have `[alt]` attributes

Format your HTML in a way that enables crawlers to better understand your app's content.

To appear in search results, crawlers need access to your app.

ADDITIONAL ITEMS TO MANUALLY CHECK (1)   Show

Run these additional validators on your site to check additional SEO best practices.
